

2019
Plant Biology

XXIII Meeting of the Spanish Society of Plant Physiology | XVI Spanish Portuguese Congress of Plant Physiology

Pamplona
June 26-28, 2019

Isabel A. Abreu is a Biochemist and her lab studies the regulation of protein activity by post-translational modifications and its impact in metabolic networks, with a particular focus on key enzymes that control plant growth during plant adaptation to environmental changes. She is Principal Investigator of the Proteome Regulation in Plants Lab and head of the Mass Spectrometry Unit (UniMS) for ITQB NOVA.
